Computer Power And Legal Language

Computer Power and Legal Language explores the central issues involved in the use of computers to conduct legal business. The contributors, all experts in their field, take as their starting point fundamental questions about the potential utility of computational models of linguistics, intelligence, and logic in the law: Is it possible to use computing to communicate in the manner legal experts do?

A "General Power of Attorney" is the authorization for another person to act on your behalf for legal, financial or business matters. You may do this, for example, if you have emigrated and have ongoing legal or business matters to attend to. In this case, it may be convenient to have an authorized person sign documents on your behalf.
